FEATURED INNOVATIONS

Designs that lead the industry

ALL-NEW · SLK 3.0  SURE STANCE KNEE

The world's 1st polycentric knee with weight-activated stance control

A breakthrough in stability and safety — the weight-activated stance lock engages up to 35 degrees of flexion, giving users confidence on stairs, ramps and uneven ground.

- ✓ Weight-activated stance lock to 35° flexion
- ✓ Polycentric geometry for a natural gait
- ✓ Engineered for everyday confidence

DAWFLEX™ FOAM COVER

A seamless cover that won't create artificial extension assist

DAWflex delivers a clean, natural cosmetic finish with a time-saving quick application — without the unwanted extension assist that compromises other foam covers.

- ✓ Seamless, lifelike appearance
- ✓ Time-saving quick application
- ✓ No artificial extension assist

WHY PRACTITIONERS CHOOSE DAW

Three decades of prosthetic innovation

We don't just supply components — we engineer original solutions and stand behind them with real technical support.

Original Engineering

Patented, in-house designs you won't find anywhere else — including industry firsts.

Patient Outcomes

Every product is built around comfort, fit, durability and the freedom to move.

Practitioner Support

Technical resources, manuals, fitting videos and a team that answers the phone.

"DAW's products and support have helped us deliver life-changing outcomes for our patients. Their innovation genuinely sets them apart."
